

# Live Prosthesis 360° - International Course

## OBJECTIVES

In the past decade, fixed prosthodontics has changed in many ways, from the application of digital technology to the development of new restorative materials that have finally made possible the application of innovative clinical protocols.

Aim of the following course is the presentation of a new and efficient prosthetic protocol (Simplified Prosthetic Protocol-SPP) that will make restorative dentistry more user-friendly and faster for the beginner as well as for the trained dentist.

This protocol and the related key-elements have been successfully applied on natural teeth as well as on implants for more than 10 years, and clinical research and follow-ups have scientifically validated the procedures that will be explained step-by-step during this course.

The Live Prostheses 360° program has been an important part of the scientific activity of Lake Como Institute for many years and has been divided into a "3-day course" to guarantee a detailed didactical phase mixed with a live presentation on patients both on teeth and implants.

## PROGRAM

### First day

- Treatment plan
- Diagnostic wax up
- Tooth preparation: different finish line
- Simplified Prosthetic Protocol presentation
- Step-by-step procedures

### Second day

- Final Impression
- Retraction methods
- Type of materials
- Use of a Digital workflow
- Step by step procedures in digital dentistry

### Third day (Implants)

- Restorative factors influencing the biology
- Type of prosthesis
- Abutment shapes
- Abutment material selection
- Final delivery and cementation

## FACULTY

*Dr. Fabio Scutellà*

## TUTORS

*Dr. Tommaso Weinstein*

**July 10-11-12, 2017**

- **Coffee breaks**  
(at 10.30 am and 4.30 pm)
- **lunch time**  
(from 1 pm to 2 pm)  
included
